

Namaste Parents,

We are standing at the completion of 3 months of the new academic year. In these 3 months we have achieved our target of meeting all class parents for the Parents' orientation. In keeping with our promise during the orientation of conducting parent workshops, the first workshop for [prep](#) parents was held on Friday 6th July, conducted by [Mamta Balasubramaniam on 'Left Brain-Right Brain'](#) for our prep parents and on 7th August for [G1 and G2](#) parents. Although the parents found it really interesting and useful, as is evident from their feedback, we were not very happy to see such a low turnout of parents. We would like more and more parents to attend the workshops as it will help you understand your child's education better.

You will get the opportunity to see the wonderful work children do in the class. You will witness a range of topics and activities in different subjects in these samples viz. [language games, story illustration, story writing, descriptive writing](#) of their favourite cartoon characters, pictures showing children engrossed in listening to stories told by grandparents, posters creating awareness of the water crisis we are currently facing, children writing their understanding of safety and personal hygiene and many more.
